

YOUR BENEFITS:

Fast installation
within minutes, without
modifications on the vehicle

Online visualization
of all vehicles and live data

Future proof
Ready for future regulations

Reporting
In-situ report generation

Multi-vehicle scenarios
to cover complex maneuvers

Real-time evaluation
of test compliance

Modular concept
for flexible use

Predefined maneuvers
according to Euro NCAP and
NHTSA regulations

**Precise, reliable,
reproducible**

Services
Consultancy, commissioning,
training, full service test
execution & reporting

- Quick installation within 10 minutes, with only one wrench
- Easy Teach-in-Set-up, no calibration needed
- Reliable assembly without vehicle modification, no scratch, no tension belts
- Secure free windscreen view, clamped mechanics and uncovered airbag area

- Comprehensive product portfolio of all official approved NCAP and ISO targets and robotic target carriers
- Robust, safe and reliable performance of test systems for daily use
- User friendly software and easy, fast and intuitive target setup

- Unique drift avoidance feature during vehicle standstill
- Shortest initialization time
- High data rate 1 kHz and low data latency (< 1ms)
- Easy-to-use and intuitive configuration via Web-browser: no additional SW needed
- Application know-how that has matured for decades
- Customer oriented & dedicated support

- Investigation and evaluation according to official NCAP protocols
- Ongoing system development to meet future requirements
- Evaluation based on a user-defined scenario catalogue
- Experience and competence in the field of OpenX parameterization
- Transformation and correlation onto HMI using a highly immersive driving simulator
